

IN THE CLAIMS

Please amend claims 1-9 and add claim 10-19 as follows:

1 1. (Currently Amended) A method of providing position
2 information of at least a first mobile terminal ~~(2)~~ and at least a
3 second mobile terminal ~~(4)~~, wherein the first and second mobile
4 terminals ~~(2,4)~~ are part of a mobile network ~~(6)~~, and wherein the
5 mobile network ~~(6)~~ comprises position determining means ~~(8)~~ to
6 determine the position information of the first mobile terminal
7 ~~(2)~~, wherein the first and second mobile terminals ~~(2,4)~~ are not
8 necessarily communicating with each other, the method comprising
9 ~~the steps of:~~
10 - determining the position information of the first mobile terminal
11 ~~(2)~~ by the position determining means ~~(8)~~, and
12 - transmitting the position information by the mobile network ~~(6)~~
13 to the second mobile terminal ~~(4)~~.

1 2. (Currently Amended) The method according to claim 1,
2 wherein the first and second mobile terminals ~~(2,4)~~ are subscribed
3 to a position information providing service offered by the mobile
4 network ~~(6)~~.

1 3. (Currently Amended) The method according to claim 1,
2 wherein the position information is determined and transmitted at
3 the second mobile terminal's ~~(4)~~-request.

1 4. (Currently Amended) The method according to claim 1,
2 wherein the second mobile terminal ~~(4)~~ comprises a database with
3 entries for mobile terminals, and wherein the second mobile
4 terminal ~~(4)~~ is arranged for requesting the position information
5 for at least part of the mobile terminals included in the database.

1 5. (Currently Amended) The method according to claim 1,
2 wherein the position information comprises ~~the absolute position of~~
3 the first mobile terminal ~~(2)~~.

1 6. (Currently Amended) The method according to claim 5,
2 wherein the second mobile terminal comprises a compass or a GPS-
3 receiver for providing further position information of the second
4 mobile terminal ~~(4)~~, and wherein the second mobile terminal ~~(4)~~
5 comprises means for determining ~~the relative position of the first~~
6 mobile terminal ~~(2)~~ with respect to the second mobile terminal ~~(4)~~
7 from the position information and the further position information.

1 7. (Currently Amended) The method according to claim 1,
2 wherein the position information comprises ~~the relative position of~~
3 the first mobile terminal ~~(2)~~ with respect to the second mobile
4 terminal ~~(4)~~.

1 8. (Currently Amended) A mobile transmission system ~~(1)~~
2 comprising a mobile network ~~(6)~~ with at least a first mobile
3 terminal ~~(2)~~ and at least a second mobile terminal ~~(4)~~, wherein the
4 first and second mobile terminals ~~(2,4)~~ are not necessarily
5 communicating with each other, and wherein the mobile network ~~(6)~~
6 comprises position determining means ~~(8)~~ to determine a position
7 information of the first mobile terminal ~~(2)~~, wherein the position
8 information is transmitted by the mobile network ~~(6)~~ to the second
9 mobile terminal ~~(4)~~.

1 9. (Currently Amended) A mobile terminal ~~(4)~~ for conducting
2 communications over a mobile network ~~(6)~~, wherein the mobile
3 terminal ~~(4)~~ is arranged for receiving a position information of at
4 least one other mobile terminal ~~(2)~~ from the mobile network, said
5 position information being determined by a position determining

6 means of the mobile network, and wherein the mobile terminal ~~(4)~~ is
7 not necessarily communicating with the at least one other mobile
8 terminal~~-(2)~~.

1 10.(New) The mobile transmission system according to claim 8,
2 wherein the first and second mobile terminals are subscribed to a
3 position information providing service offered by the mobile
4 network.

1 11.(New) The mobile transmission system according to claim 8,
2 wherein the position information is determined and transmitted at
3 the second mobile terminal's request.

1 12.(New) The mobile transmission system according to claim 8,
2 wherein the second mobile terminal comprises a database with
3 entries for mobile terminals, and wherein the second mobile
4 terminal is arranged for requesting the position information for at
5 least part of the mobile terminals included in the database.

1 13.(New) The mobile transmission system according to claim 8,
2 wherein the second mobile terminal comprises a compass or a GPS-

3 receiver for providing further position information of the second
4 mobile terminal, and wherein the second mobile terminal comprises
5 means for determining position of the first mobile terminal with
6 respect to the second mobile terminal from the position information
7 and the further position information.

1 14.(New) The mobile transmission system according to claim 8,
2 wherein the position information comprises position of the first
3 mobile terminal with respect to the second mobile terminal

1 15.(New) The mobile terminal according to claim 9, wherein
2 the mobile terminal and the at least one other mobile terminal are
3 subscribed to a position information providing service offered by
4 the mobile network.

1 16.(New) The mobile terminal according to claim 9, wherein
2 the position information is determined and transmitted at the
3 mobile terminal's request.

1 17.(New) The mobile terminal according to claim 9, wherein
2 the mobile terminal comprises a database with entries for mobile

3 terminals, and wherein the mobile terminal is arranged for
4 requesting the position information for at least part of the mobile
5 terminals included in the database.

1 18.(New) The mobile terminal according to claim 9, further
2 comprising a compass or a GPS-receiver for providing further
3 position information of the mobile terminal, and means for
4 determining position of the at least one other mobile terminal with
5 respect to the mobile terminal from the position information and
6 the further position information.

1 19.(New) The mobile terminal according to claim 9, wherein
2 the position information comprises position of the at least one
3 other mobile terminal with respect to the mobile terminal.
